

PREMIER ELECTRONICS Achieves Approval From FIAT CHRYSLER AUTOMOBILES (FCA Group)

SUGAR LAND, Texas – May 1, 2019 – Premier Electronics (UPE LLC) a state of the art electronic manufacturing solutions company, established in 2005, is proud to announce that it has been approved by Fiat Chrysler Automobiles (FCA) to be a vendor after successfully completing a manufacturing audit in April 2019. This certification is another step in adding the automotive market as part of the Premier customer base which includes Industrial, Medical and the Energy sector.

The completion of the recent audit with FCA along with Nissan Motor Co, Ltd (approved in 2018) with the IATF16949 certification (2018) provides continued diversification and growth. The highlight of the audit centered around Premier's processes and commitment to quality at a World Class level. This approval separates Premier in the Electronic Manufacturing Services marketplace and will continue to assist with the On-Shoring of manufacturing previously sourced outside the United States.

"FCA approval has been part of our business development plan for over 2 years and is the culmination of our commitment to diversification, quality and excellence offered to our customers. We look forward to growth and true partnering with our clients allowing us to become a direct extension of their company with regards to manufacturing."

Scott Goggans, Founder/CEO, Premier Electronics

About Premier Electronics

Premier Electronics is a state of the art electronics contract manufacturer in the heart of the energy sector located just outside of Houston. Since 2005 Premier has offered the Gulf Coast region a high/medium volume supplier of electronics assembly. IPC 610 Class 1, 2 and 3 workmanship standards are met and verified by an onsite IPC trainer and certified assemblers. Premier Electronics is both IATF16949:2016 & ISO 9001:2015 registered company where *quality is everyone's responsibility*.
